Alto: Apple Notes Exporter

August 13, 2024 · [read online](#)

Hi everyone.

Anton here.

I just released first paid feature in Alto app. Apple Notes Exporter.

Video how it works <https://www.youtube.com/watch?v=21rRZEhCMoo&t=2s>

Why is it needed?

There are tons of stories like this online https://www.reddit.com/r/AppleNotesGang/comments/1epfox4/notes_disappeared_need_help_desperately/

From time to time people loose their notes.

So I made exporting functionality so that you can backup at least some information from the notes. Currently it exports notes to HTML format(with all the images, videos and files).

If you try this tool and have some feedback - please tell me.

Anton
