alto publishing features

January 18, 2025 · [read online](#)

Hi everyone,

I want to add few more things to alto.so. Specific for custom sites.

What is missing for you? What is not clear?

Recently I updated docs a bit on customization <https://docs.alto.so/metadata>.

I also created my new website with alto <https://antiantihuman.com/>. I really like what I can do with it.

Also realized through support emails that it is not clear that Alto sites have integration with <https://recuremail.com/>.

If you create newsletter in recuremail and add link to it to alto - it will render as nice subscribe box.

Give it a try!

Anton
