Hi everyone,

Anton here.

Thank you for trying alto.computer macOS app and alto.so.

I have few questions to you since you are the early users.

1. Did you discover Alto through Montaigne or in some other way?
2. I know signup process is a bit confusing now (I'm working on it), but what else should be improved?

If you use Alto everyday (I am) please write to me.

PS Since some of you joined before publishing Apple Notes was possible here is small video showing how publishing works now
