# Alto updates. Sept 27

September 27, 2024 · [read online](#)

---

Hi everyone,

Anton here.

Launched a new app. Called alto.mail <https://apps.apple.com/us/app/alto-mail/id6717600529?mt=12>.

See how it works

<https://www.loom.com/share/0949939e9199437f84dbe674bdb466de>

It has similar mail functionality to alto.computer - copy link to email, create reminder.

But it can do more.

You can select email and see all sent/received emails to the same address.

So you can scan if you talked to the person before.

Or you can see that you got 534 from some newsletter in the past 10 years.

You also can see some basic stats over the years/month from your mailboxes.

I want to add following things next:

- add ability to extract/summarize receipts. For example you can click on Uber or Netflix and see how much did you pay them.
- a bit more analytics
- few more tools for newsletters. Identify them and help you to unsubscribe if needed.

Anton
