Apple Photos support in Alto

August 25, 2024 · [read online](#)

Hi everyone,

I've launched proper support for Apple Photos in Alto.

Now you can publish photos (or better albums) same way as Apple Notes.

Here is demo <https://www.youtube.com/watch?v=9UVdi2QiIXs>

Here are some of albums I published <https://alto.so/anton/photos>

This support is replacement for <https://public.photos/> - product that I've made last year.

Anton
