# new product and some idea on the future of tech

May 25, 2025 · [read online](#)

---

Hi everyone,

First update in over 3 months.

I've spent tons of time using Claude and Claude Code.

It's crazy what is possible now.

It took me several months to implement <https://montaigne.io> <https://montaigne.io/> back in 2022.

It still took me several months to make <https://alto.so/> in 2024. I needed to learn how to make macOS app in addition to implementing web version.

In the past year and especially in the past 2.5 month the speed of development changed for everyone. What used me several months of work can be done in 3 days now.

It's a new world. I wrote about it here <https://altonote.com/anton/what-is-coming>.

If you had a chance to play with AI tools like Claude and know what MCP is you can try my new product <https://altonote.com/>. It works same way as montaigne or alto.computer. but now inside you AI chats you can just type "publish this" and it will publish text to your personal page.

If you didn't have a chance to play with tools I will record few videos and will send another update soon. It's really fascinating direction for the technology and personal computing.

PS If you have questions please just reply to this email.

Anton
